SUMMARY

I love JavaScript & Open Source software. React & Redux has changed the way I look at building products.

EXPERIENCE

Software Engineer, Assembly Payments; Manila, Philippines   Apr 2016 Present

- Created internal tools using React & Redux to help improve communication workflow between developers & service delivery managers.

- Implemented 3d Secure payment process in our Ruby on Rails API.

- Implemented major features in our dashboard web application using Angular.js.

Software Engineer, AgTech Labs; Manila, Philippines   Aug 2015 Apr 2016

- Developed & maintained API written in Python & Django.

- Restructured Angular.js web application to adhere to industry's best practices.

- Implemented aggregation & grouping techniques to visualize thousands of entries of data over a period of time.

Software Engineer, Lovestock & Leaf; Manila, Philippines   Dec 2014 Aug 2015

- Created apps to extend the customer's experience with the Zendesk Platform.

- Created server side processes to handle data flow between front end apps using Node.js.

- Created API services to serve data stored in our MySql/Mongodb databases.

Software Engineer, Aarki; Manila, Philippines   Nov 2012 May 2014

- Developed interactive HTML5 Rich Media projects using Javascript.

- Created widgets & implemented various UI upgrades for our Rich Media Product: Aarki Studio.

- Developed and implemented unique, creative and innovative concepts and design strategies.

EDUCATION

Dev Bootcamp, San Francisco **2014**
Web Development

De La Salle College of Saint Benilde **2012**
Bachelor of Arts (B.A.) Multimedia Arts 2012

RECOMMENDATIONS

Jesse Martin, Co-Founder and CPO, Agtech Labs
"RJ worked for us at Agtech Labs for a period of about 7 months and I can honestly say that he is one of the hardest working developers that I know. He pours his heart in sole into every project that he starts. He is self motivating and has a work ethic beyond most. He is a fast learner and with the proper mentorship I believe RJ can tackle any technology or problem that he is faced with. He is eager to learn and is driven to grow his skill set as fast as possible for his own personal pride. I would gladly hire him again if presented with the opportunity. I would be happy offer a recommendation to anyone that is looking to hire him. "

Damien Whaley, Lead Software Engineer, Lovestock & Leaf
"I worked with RJ at Lovestock and Leaf. He is a great worker. RJ picked up quite complex concepts with relative ease and was able to debug issues and solve problems. RJ is intelligent, and communicates clearly and effectively. I'd recommend RJ. If he was in Australia I'd be offering him a job!"
